

Microsoft Ignite

Build agents with knowledge, agentic RAG and Azure AI Search

Matt Gotteiner, Senior Program Manager

Pamela Fox, Principal Cloud Developer Advocate

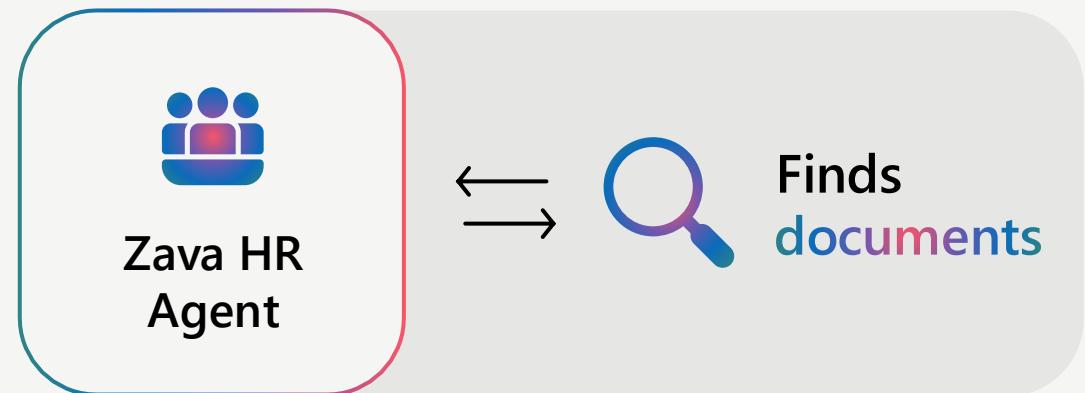

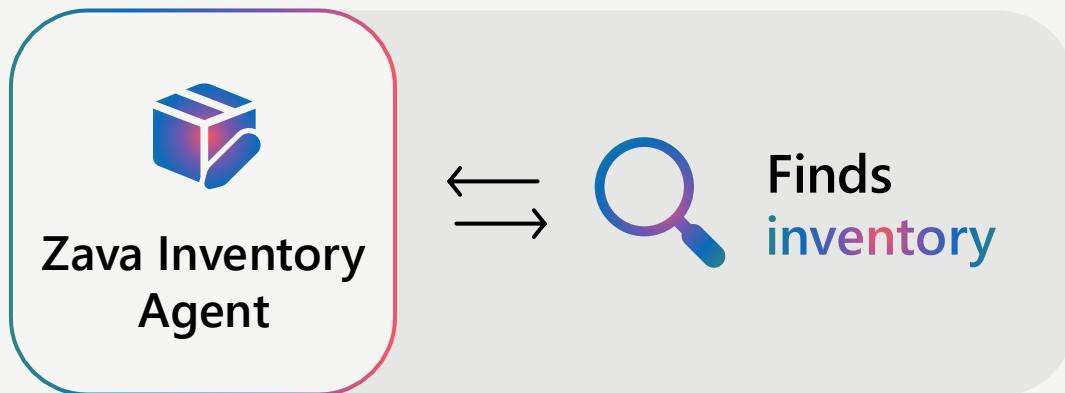

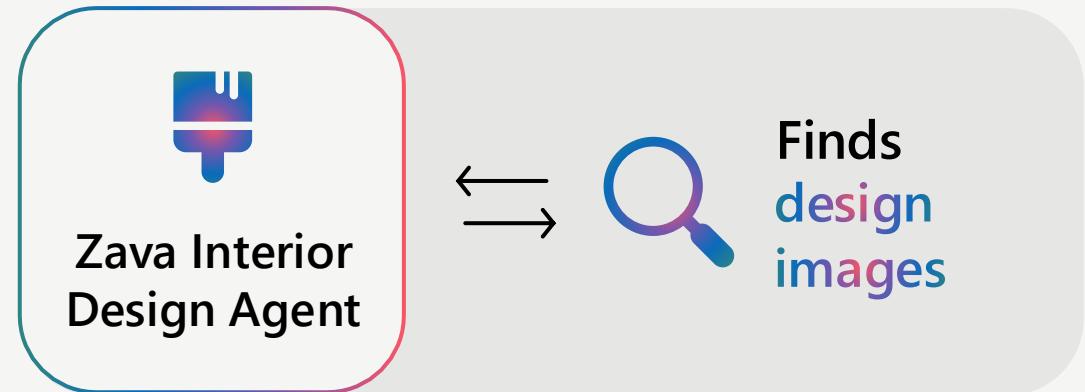

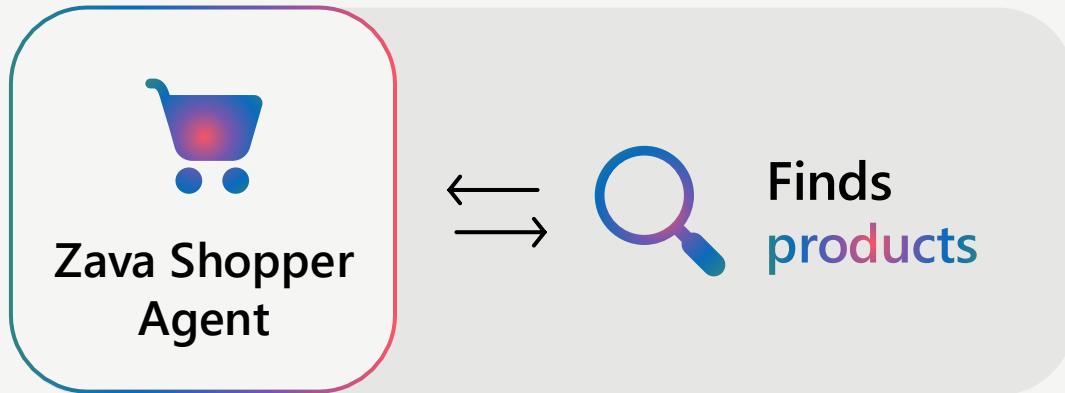

Agenda

- RAG 101
- Knowledge Bases in Azure AI Search
- Microsoft Foundry and Knowledge Bases
- Q&A

Introduction to RAG

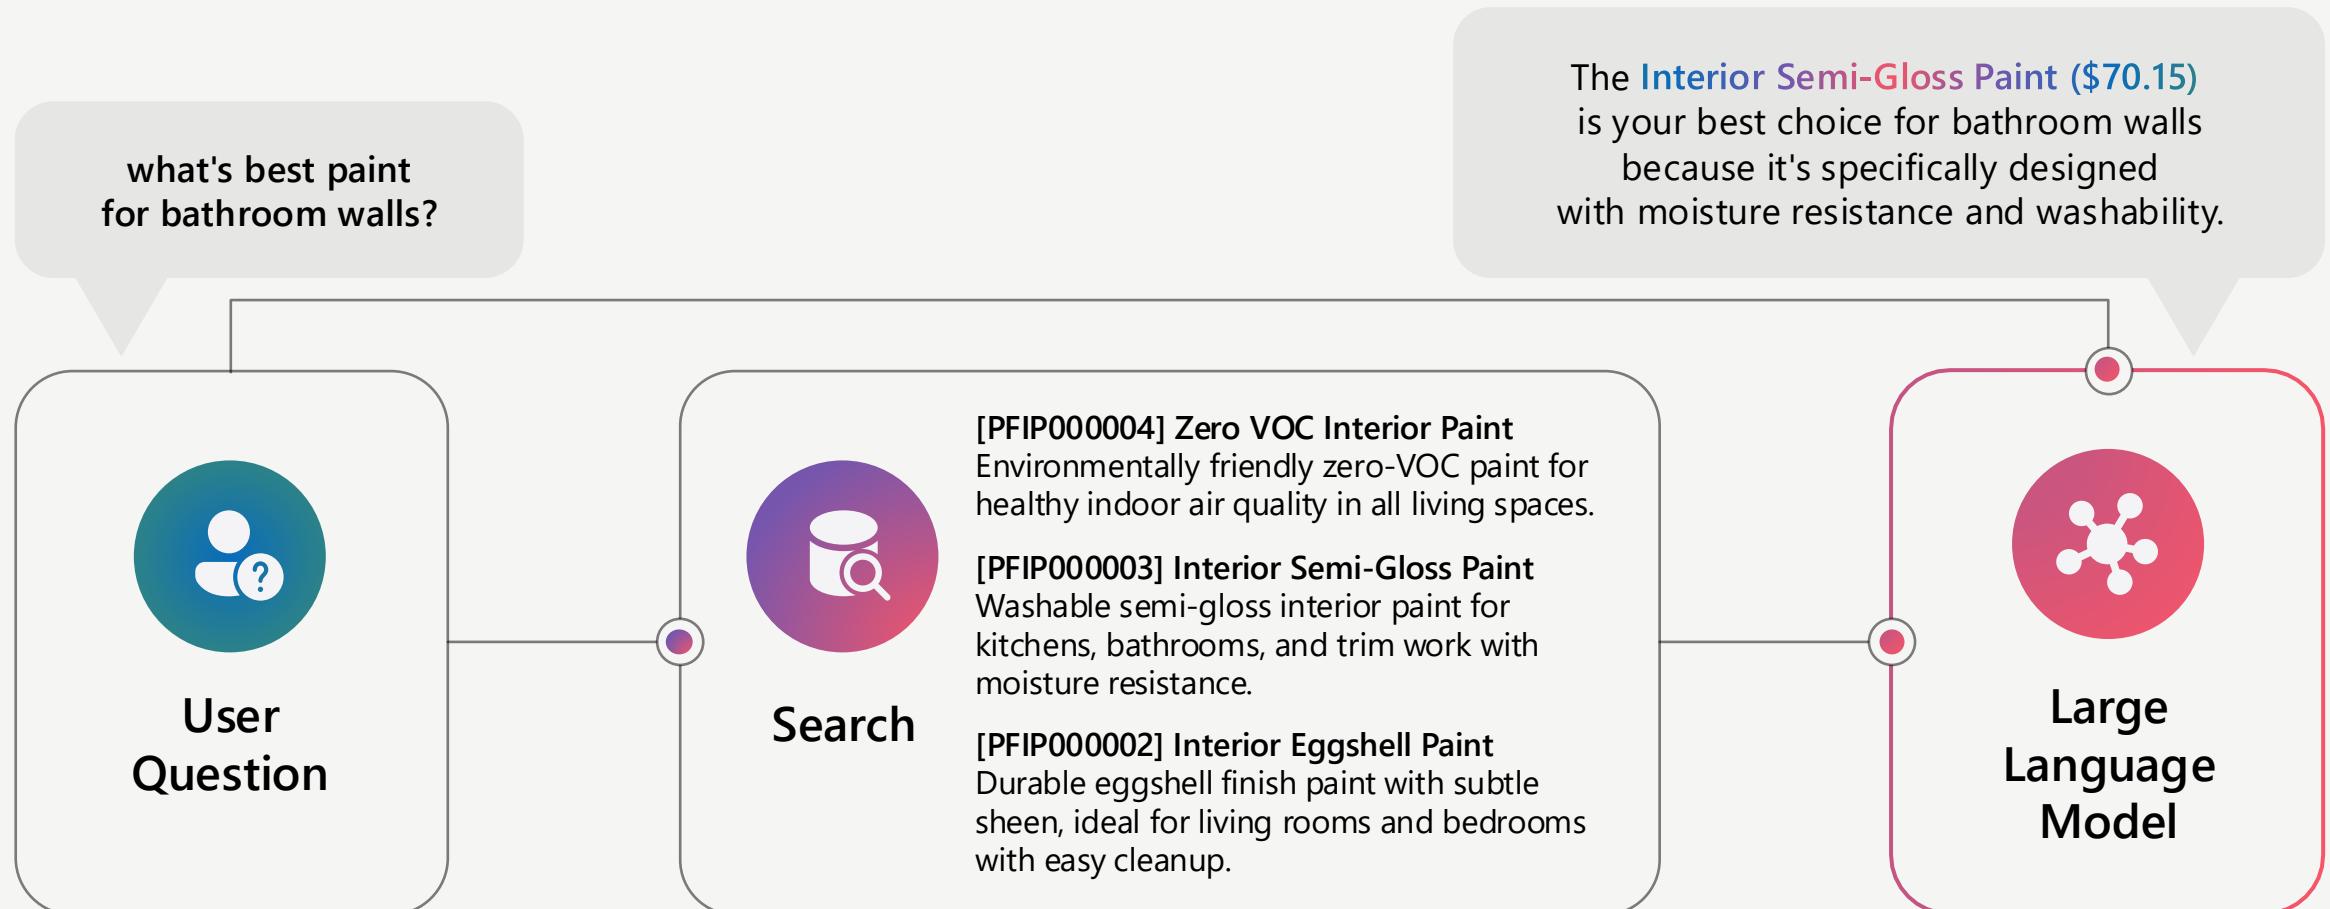

Every domain needs agents. Every agent needs context.

How do agents use context? RAG!

Retrieval-Augmented Generation (RAG) grounds the response from an LLM in the retrieved context.

Azure AI Search

State-of-the-art retrieval

Rigorously tested
retrieval

Streamlined
data pipeline

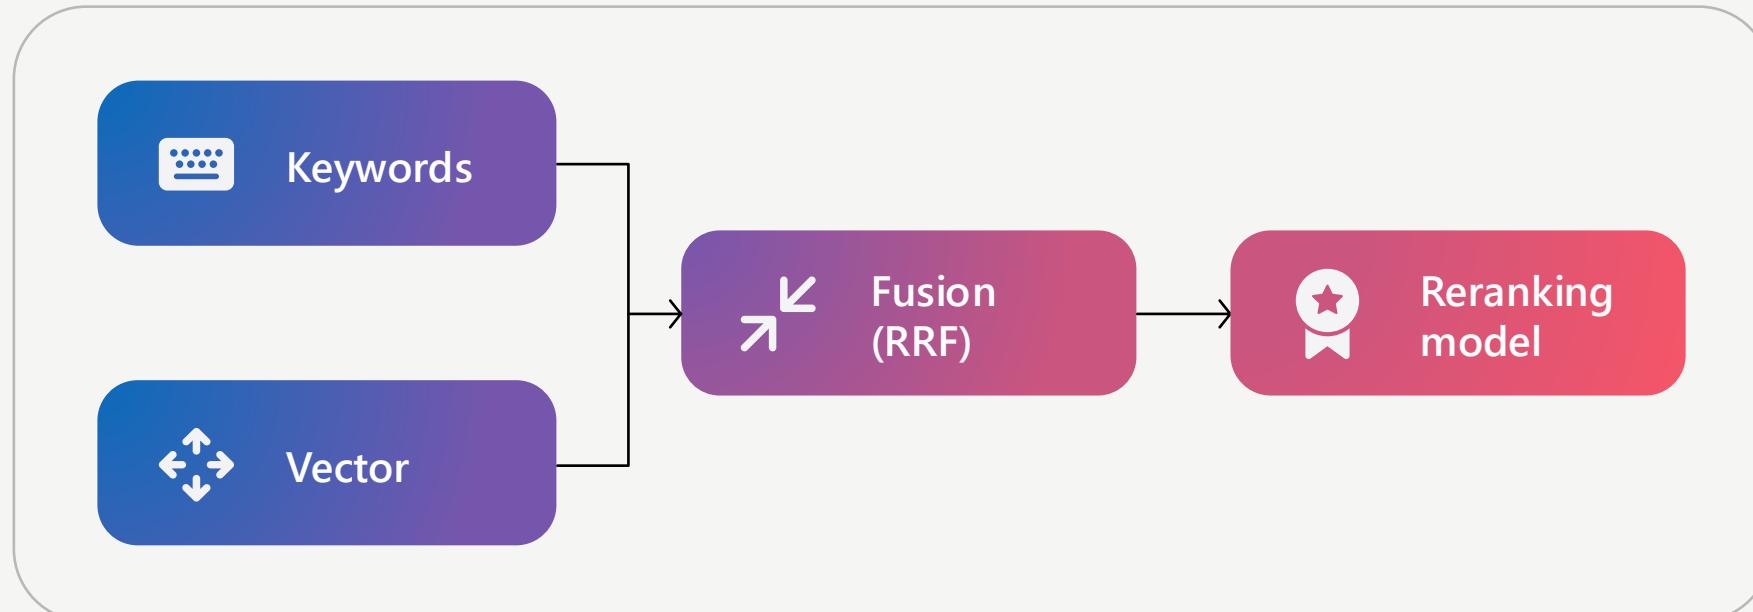

Developer
integrations

Enterprise-ready
foundation

Hybrid search: Optimal retrieval strategy

Complete search stacks do better:

- Hybrid retrieval (keywords + vectors) > pure-vector or keyword
- Hybrid + Reranking > Hybrid

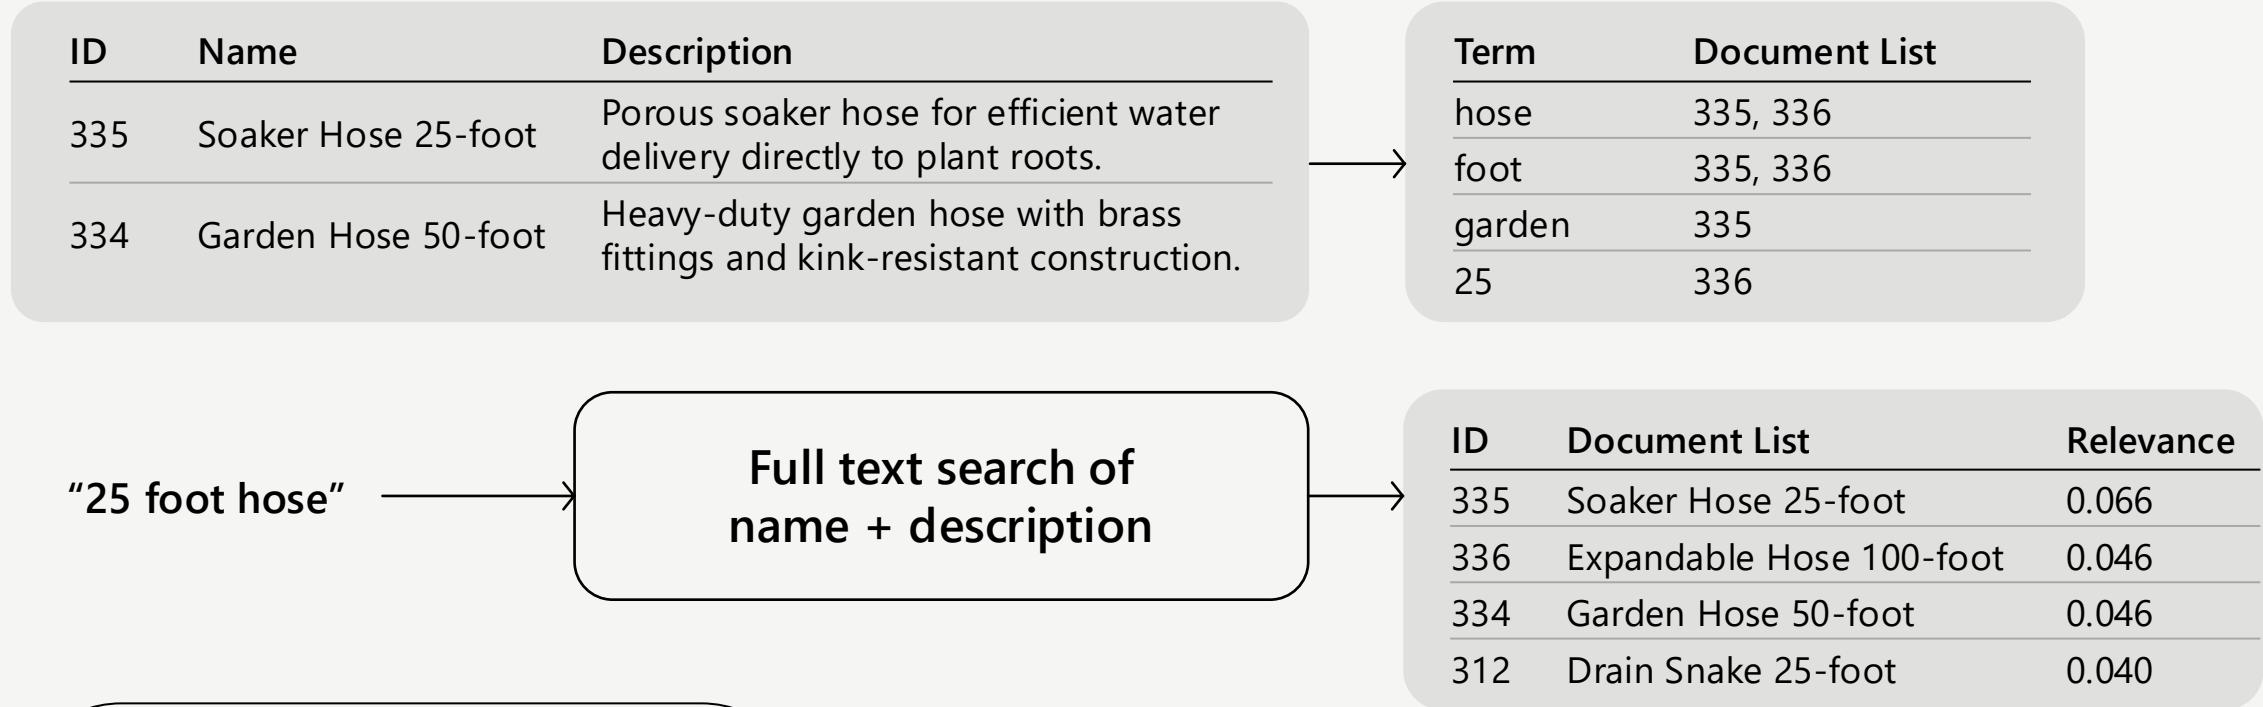

Let's break
those down...

Keyword search

Best for: exact phrase matches

Documents are stored in an **inverted index** which can be queried efficiently.

Example:

aka.ms/aisearch-examples
zava_search_keyword.py

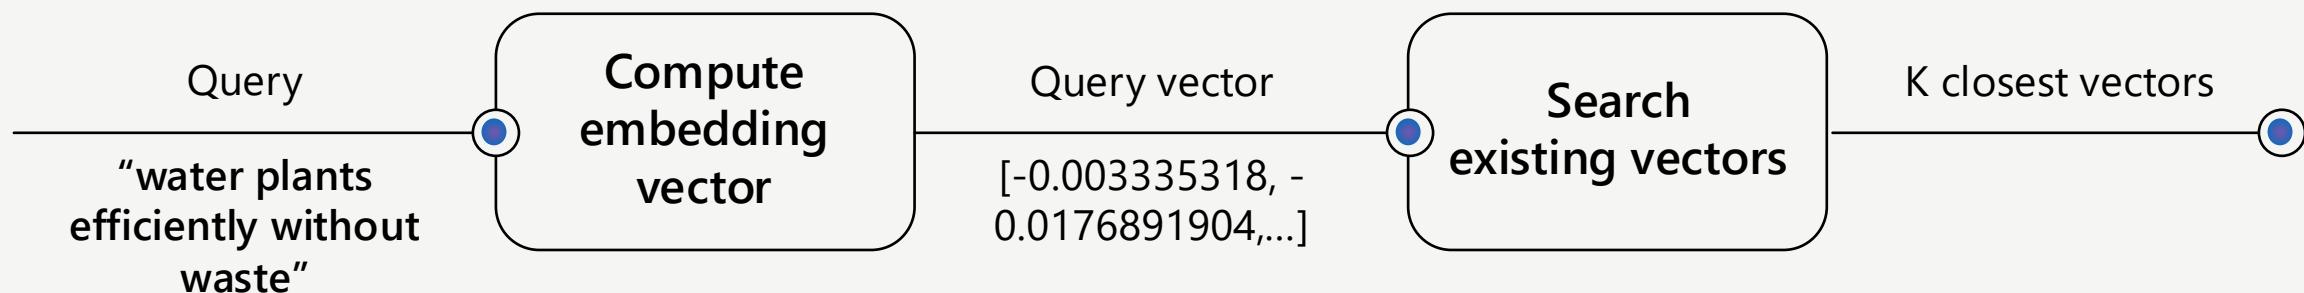

AI Search uses the **BM25** algorithm, commonly considered to be the best full-text search algorithm.

Vector search

Best for: conceptually similar matches

1. Encode queries as embeddings (lists of floating point numbers)
2. Find semantically similar documents by comparing embeddings

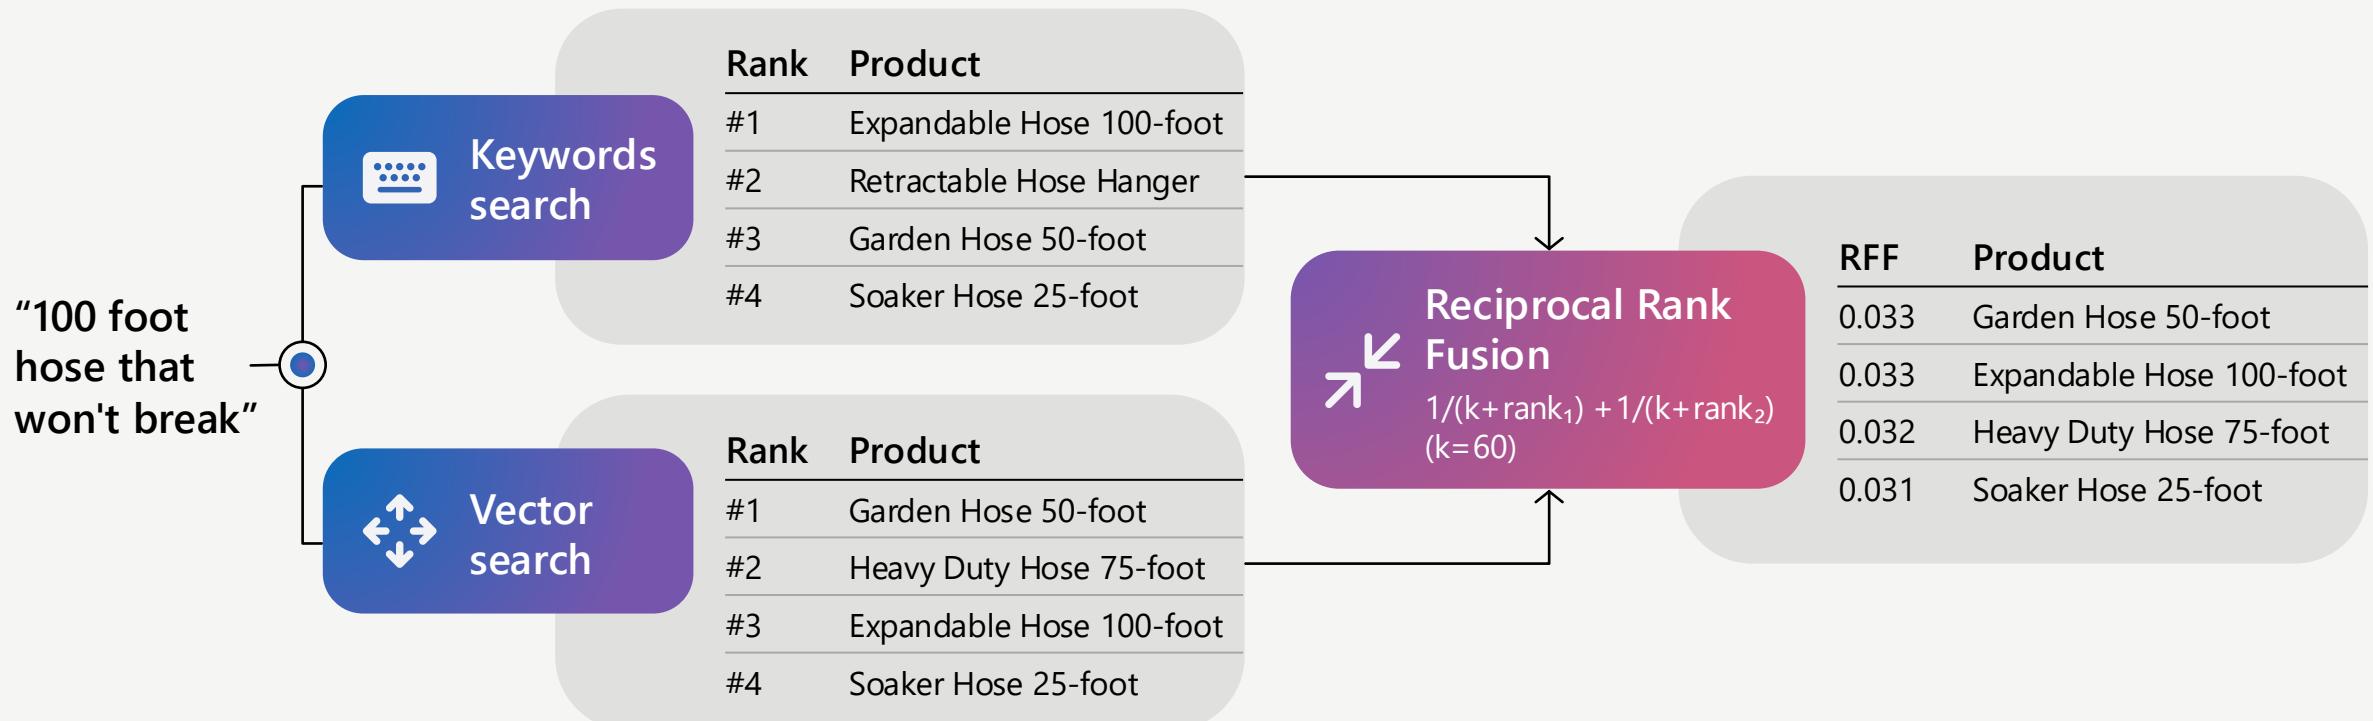

AI Search can use the **HNSW** approximation algorithm for more efficient search across massive vector indices.

Example:
aka.ms/aisearch-examples
zava_search_vector.py

Name	Cosine Similarity
Self-Watering Planter	0.632
Misting Sprinkler	0.610
Tomato Plant Food	0.591

RRF: Reciprocal Rank Fusion

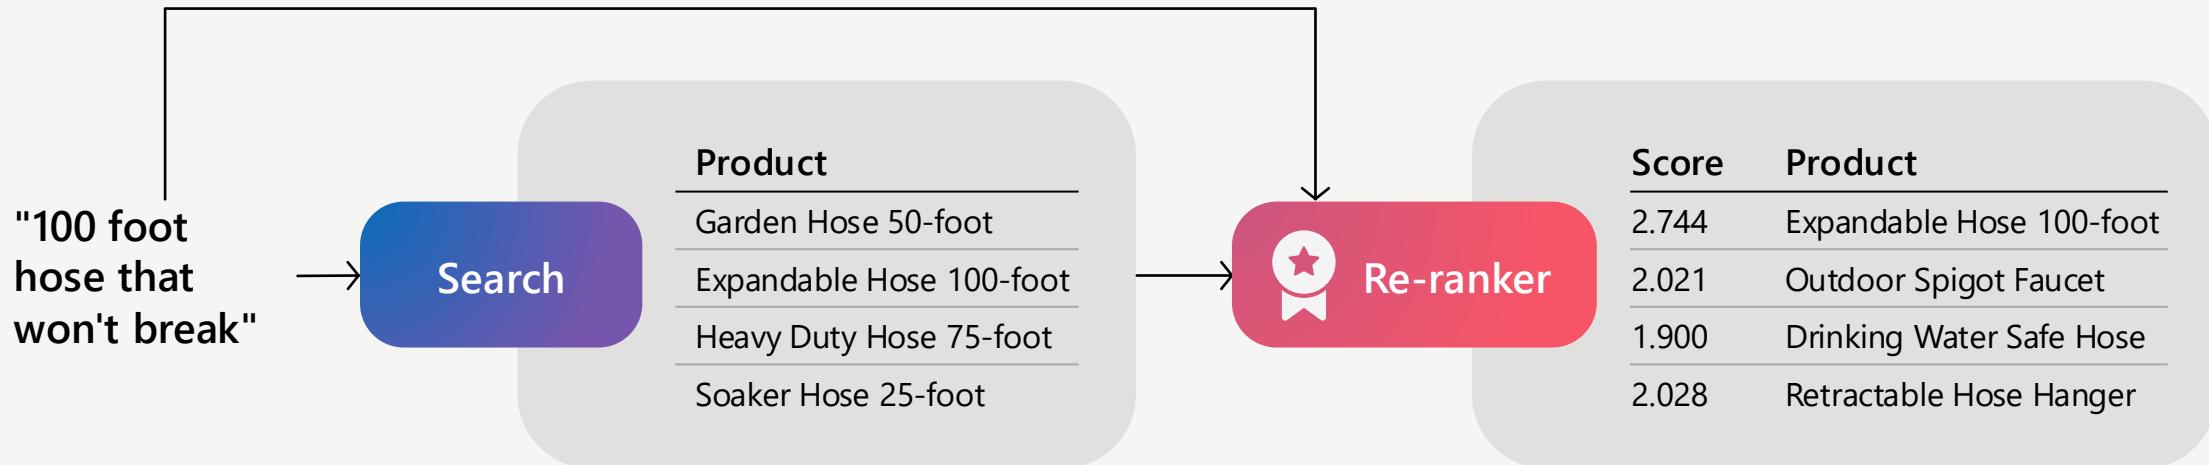

Using text **and** vector search? Merge results using RRF to rank results based off their relative ranks.

Example:
aka.ms/aisearch-examples
zava_search_rrf.py

Re-ranking

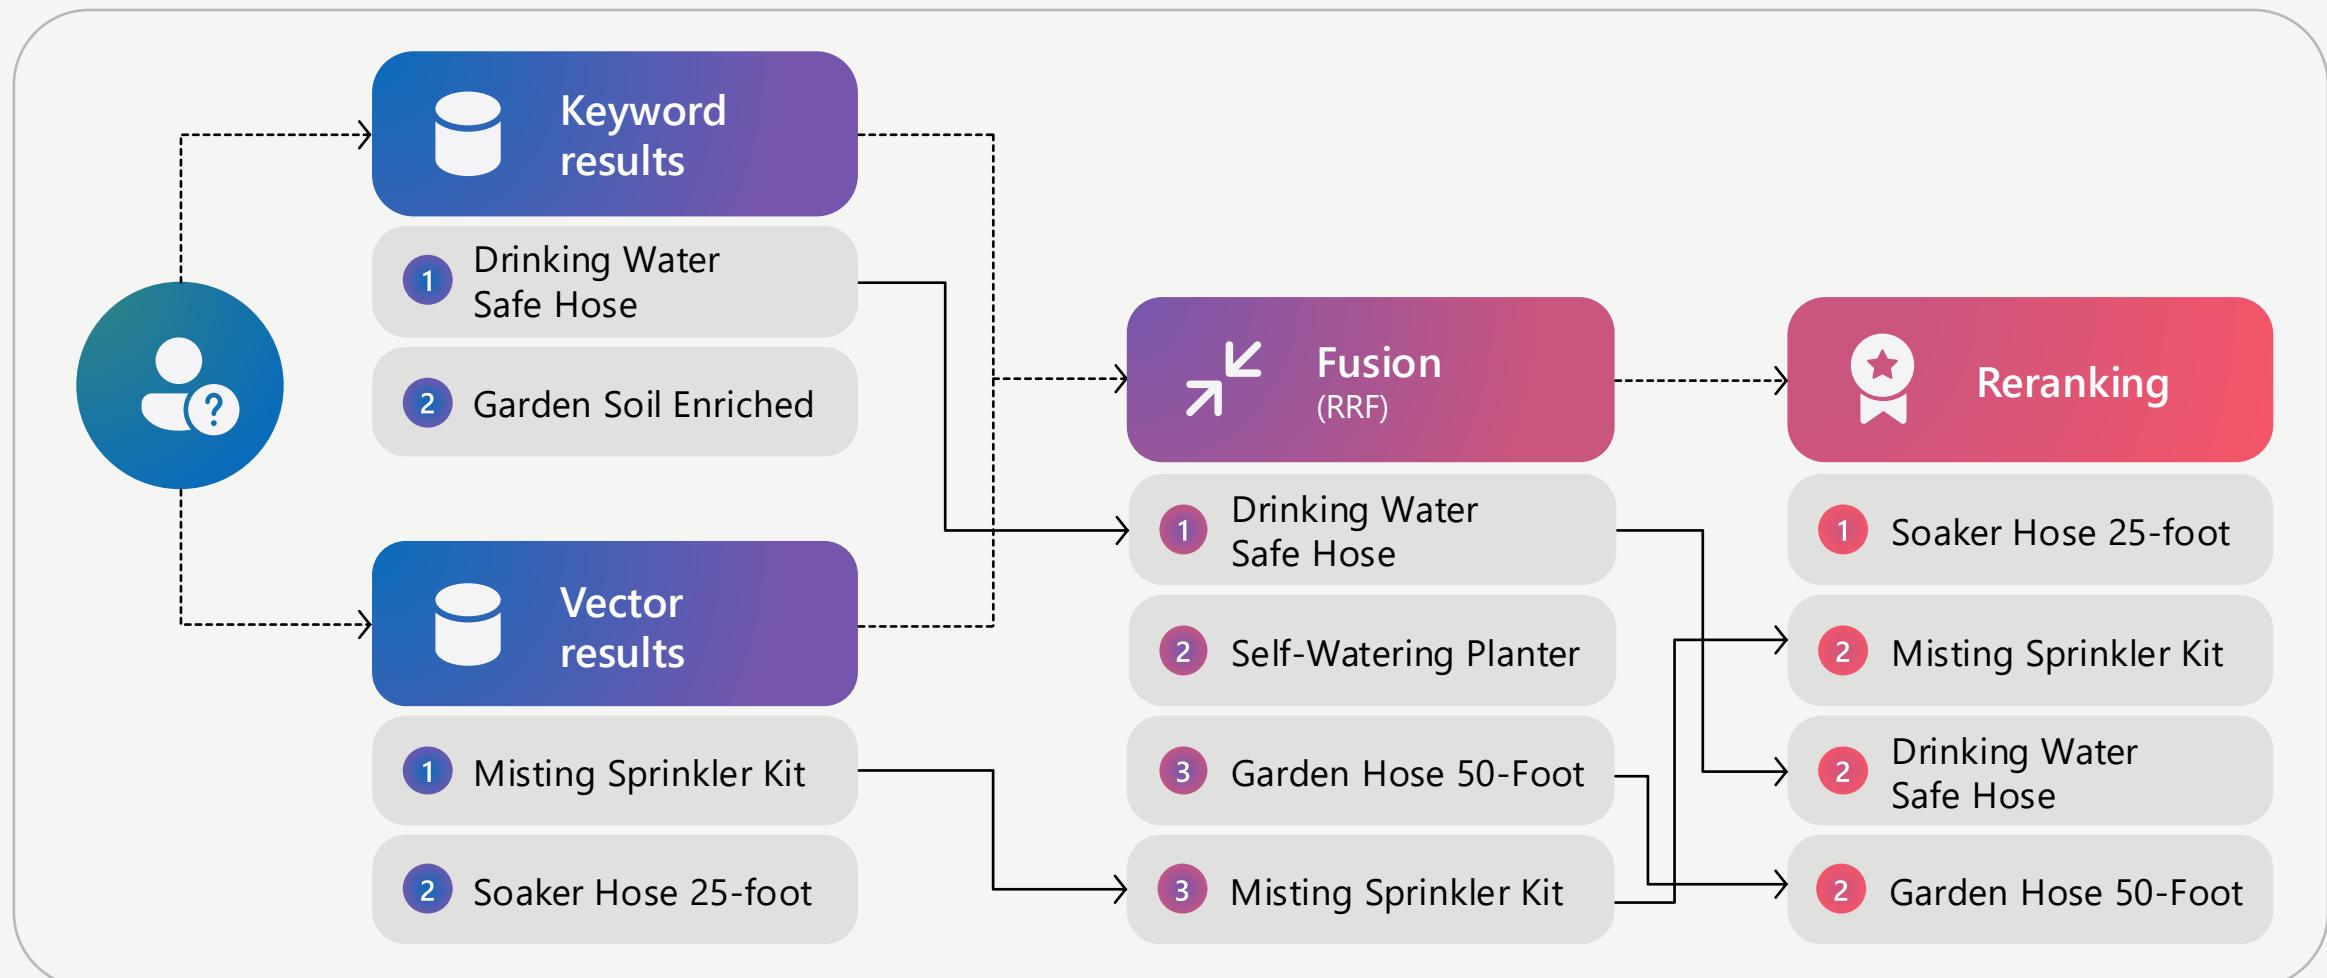

A re-ranking step assigns documents a relevance score according to the original query. AI Search uses a **cross-encoder** model for the re-ranking step, which was trained on human scores.

Example:
aka.ms/aisearch-examples
zava_search_reranker.py

A complete hybrid search flow

Question: "garden watering supplies"

Impact of hybrid search across query types

Query type	Keyword [NDCG@3]	Vector [NDCG@3]	Hybrid [NDCG@3]	Hybrid + Semantic ranker [NDCG@3]
Concept seeking queries	39	45.8	46.3	59.6
Fact seeking queries	37.8	49	49.1	63.4
Exact snippet search	51.1	41.5	51	60.8
Web search-like queries	41.8	46.3	50	58.9
Keyword queries	79.2	11.7	61	66.9
Low query/doc term overlap	23	36.1	35.9	49.1
Queries with misspellings	28.8	39.1	40.6	54.6
Long queries	42.7	41.6	48.1	59.4
Medium queries	38.1	44.7	46.7	59.9
Short queries	53.1	38.8	53	63.9

When hybrid search isn't always enough...

Multiple questions in one query

What type of paint would be most suitable for a bathroom, and what is the estimated cost range for high-quality options?

Chained queries

Explain how to paint my house most efficiently. Then give me a list of the Zava products and prices for each supply

Queries requiring external knowledge

What's the best Zava sander for table corners and when do I replace my sanding pad?

Knowledge Bases in Azure AI Search

Agentic retrieval with knowledge bases

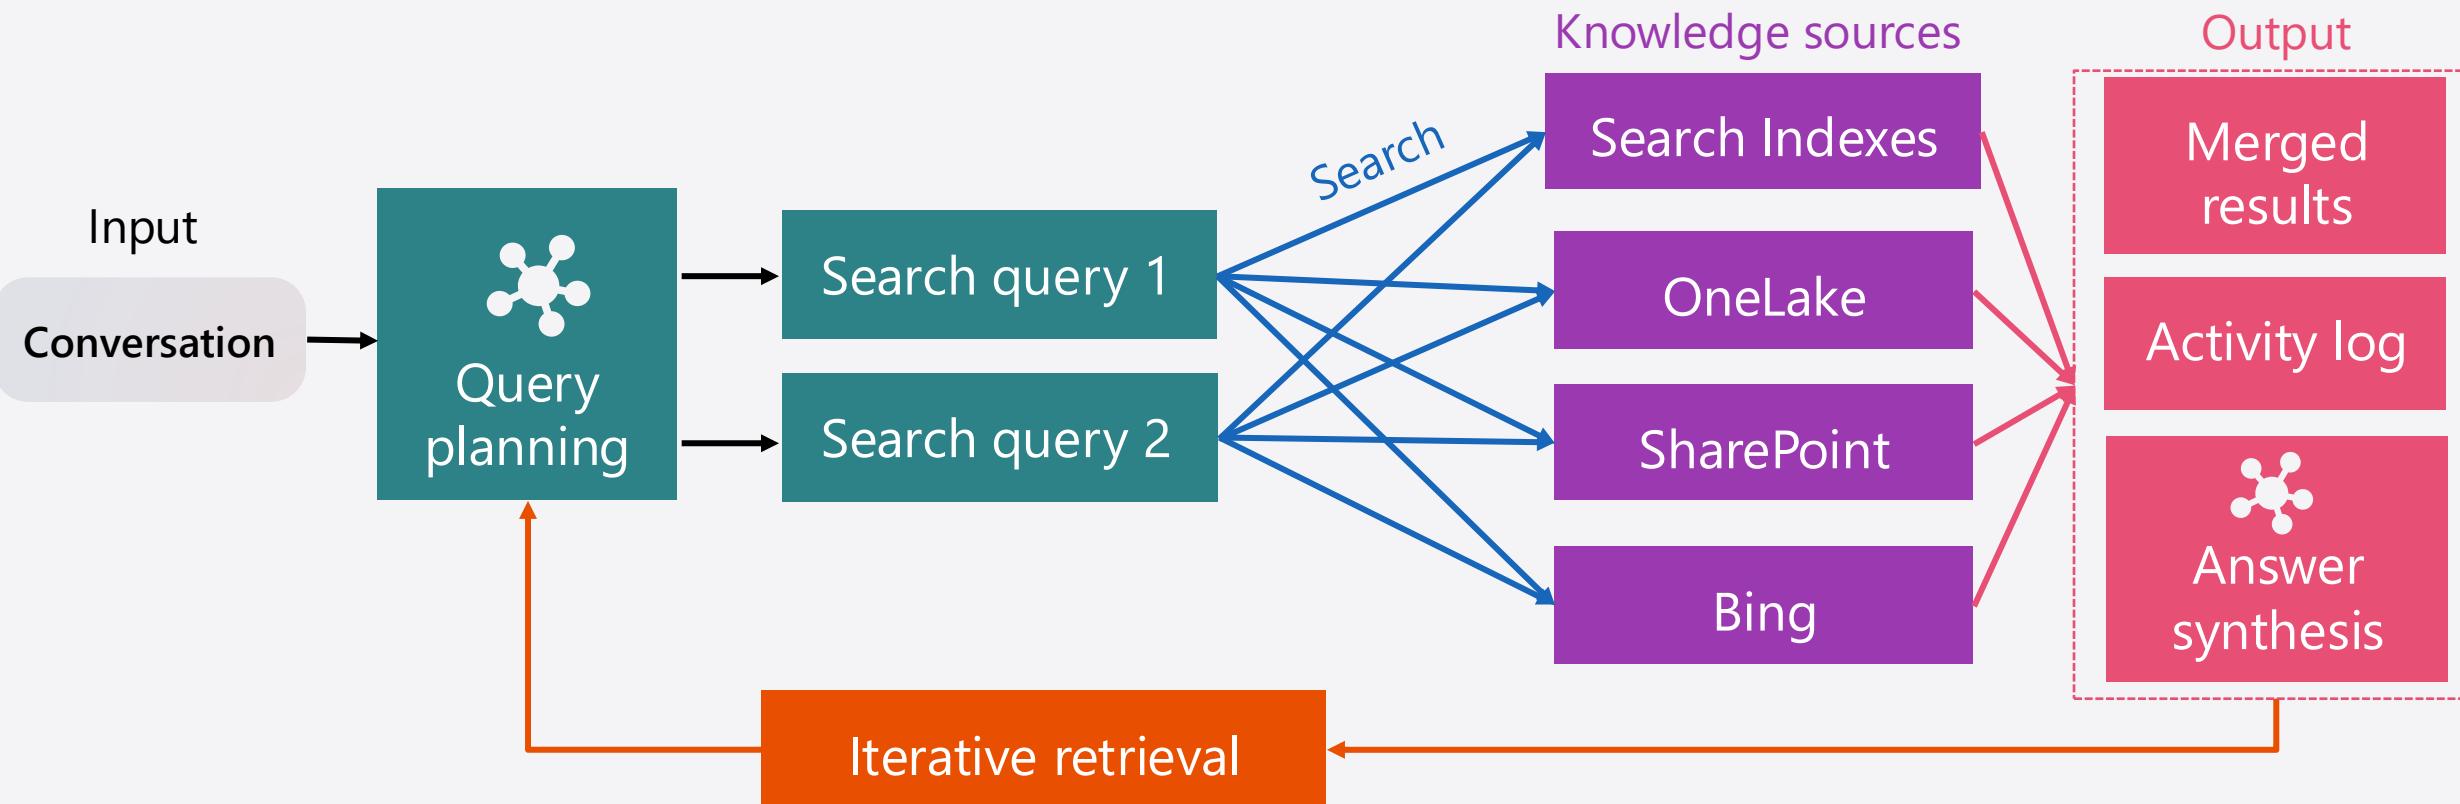

Public preview

Agentic methods applied to retrieval

Query planning

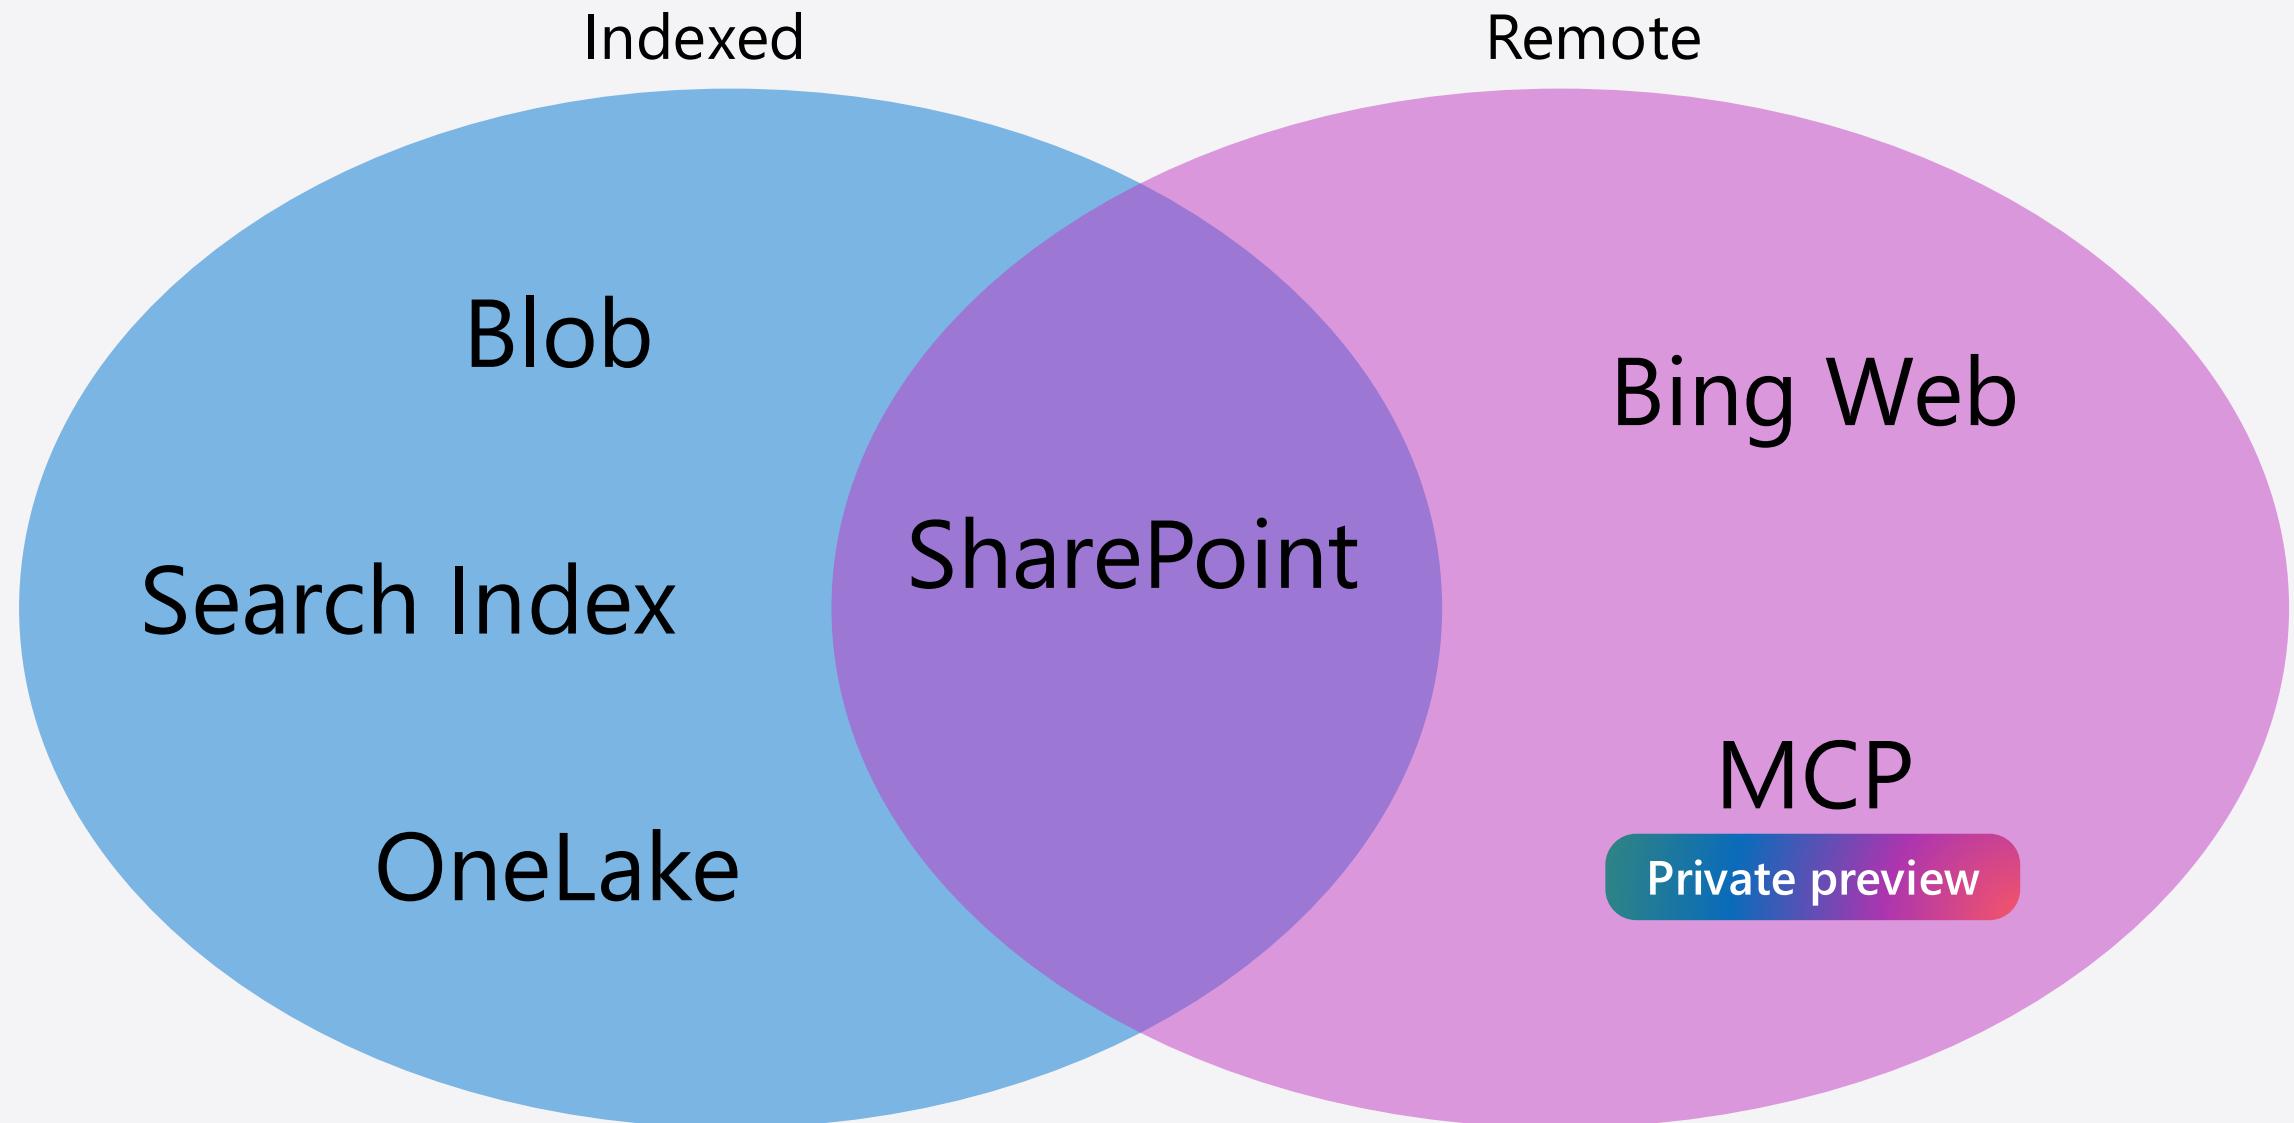

Knowledge source selection

Results merging

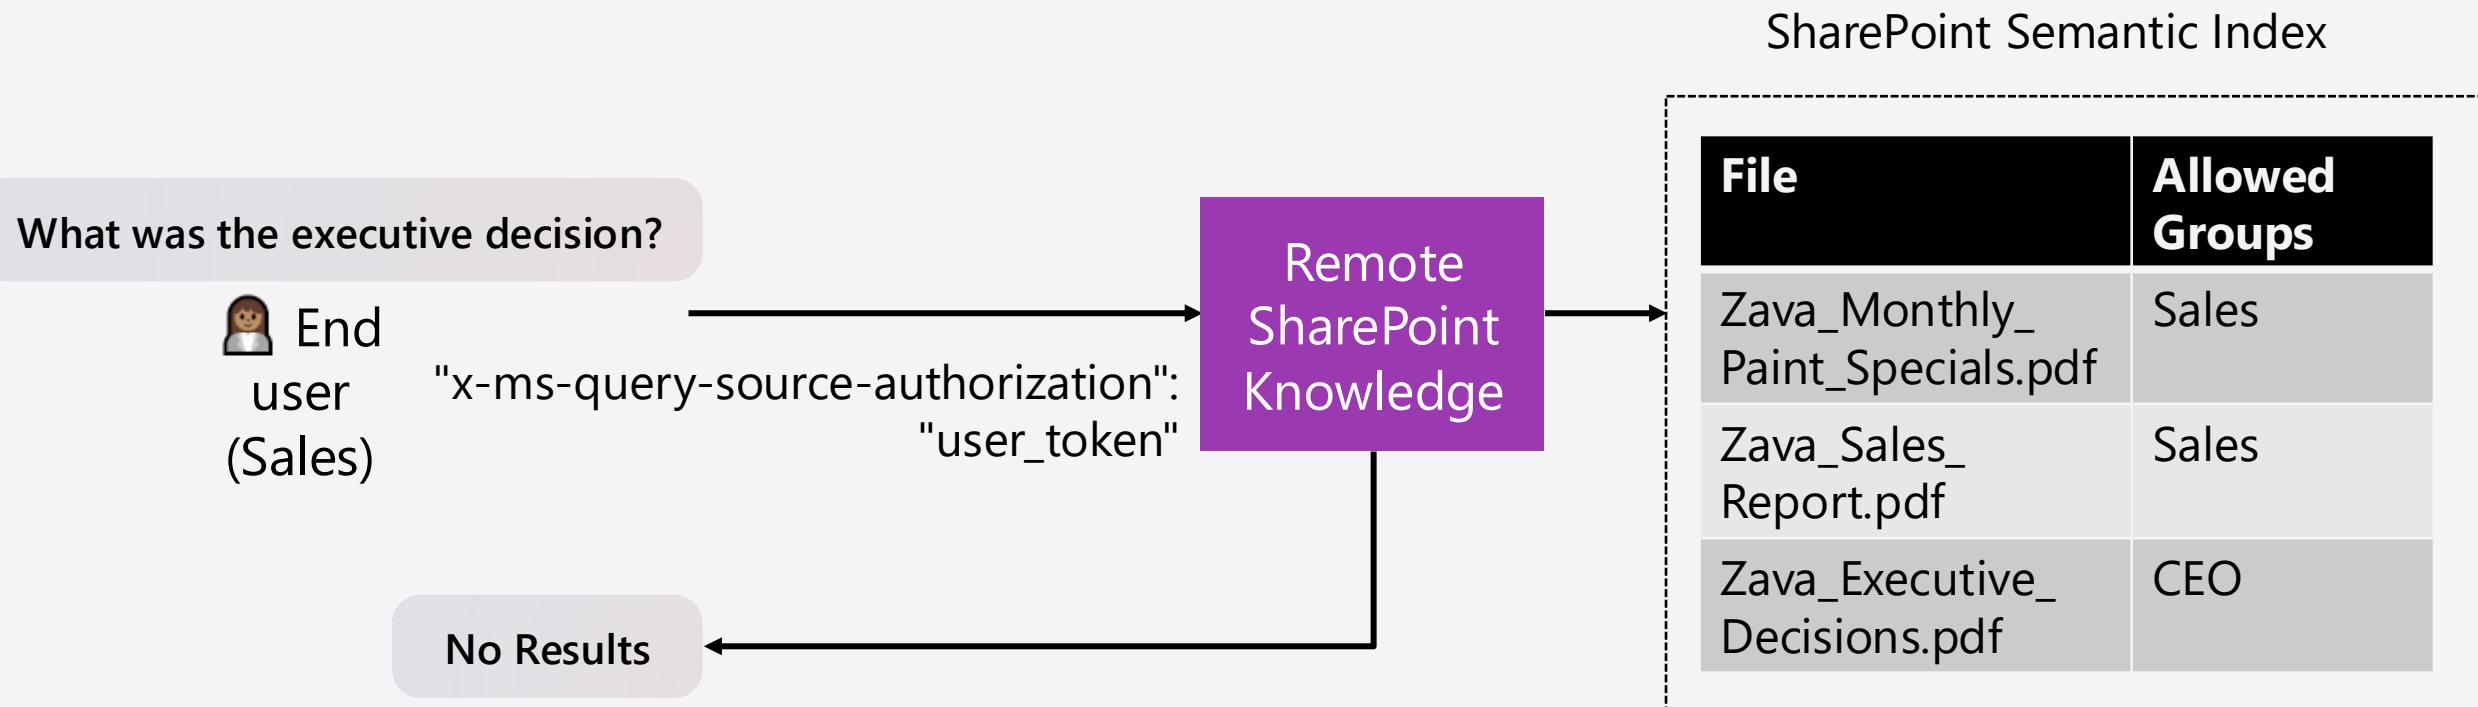

Search step uses hybrid search with semantic re-ranking when supported by the knowledge source

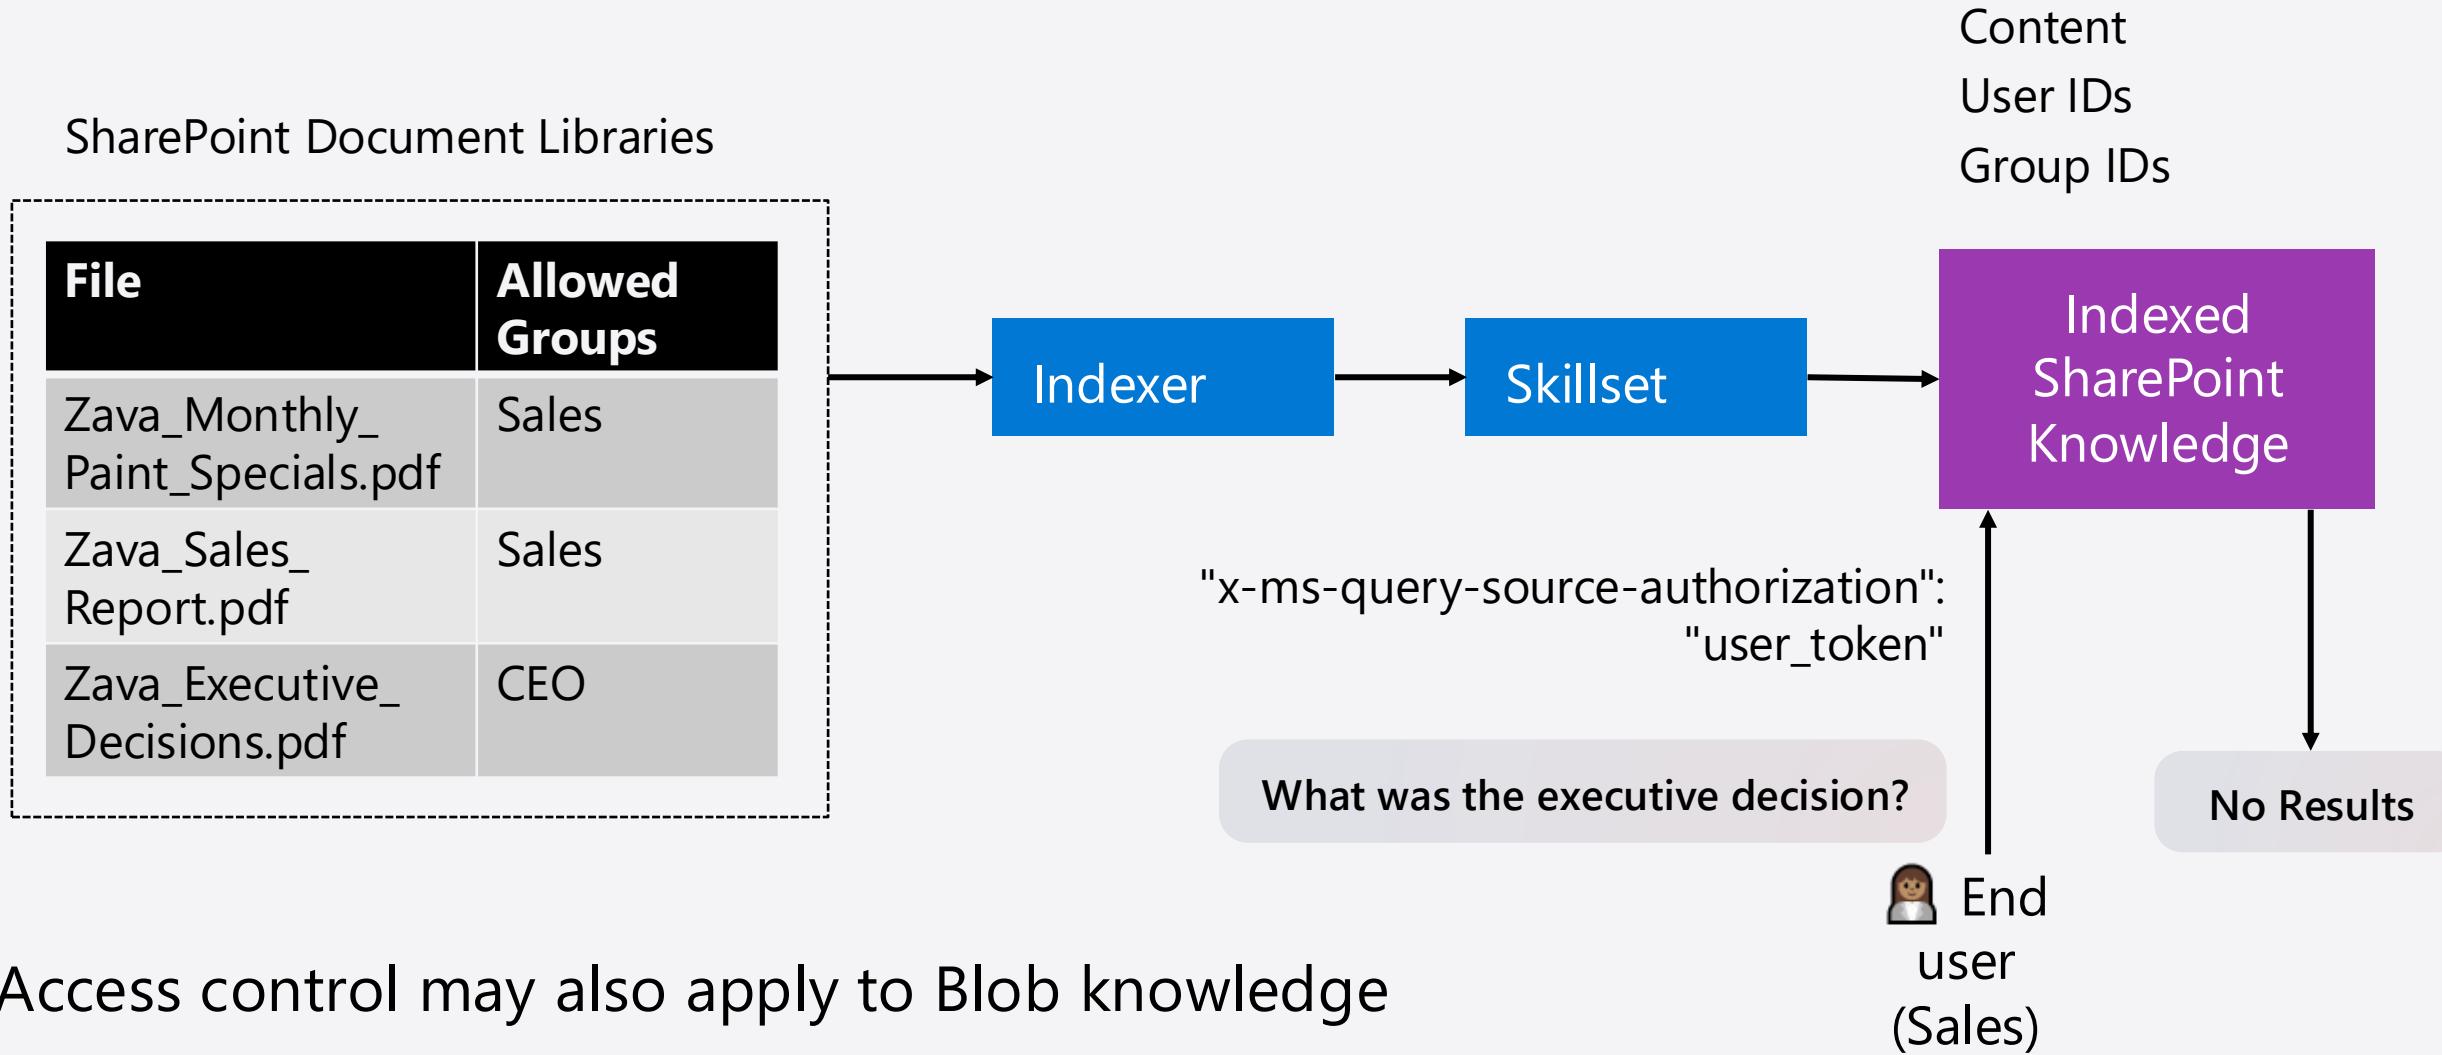

Indexed and Remote Knowledge Sources

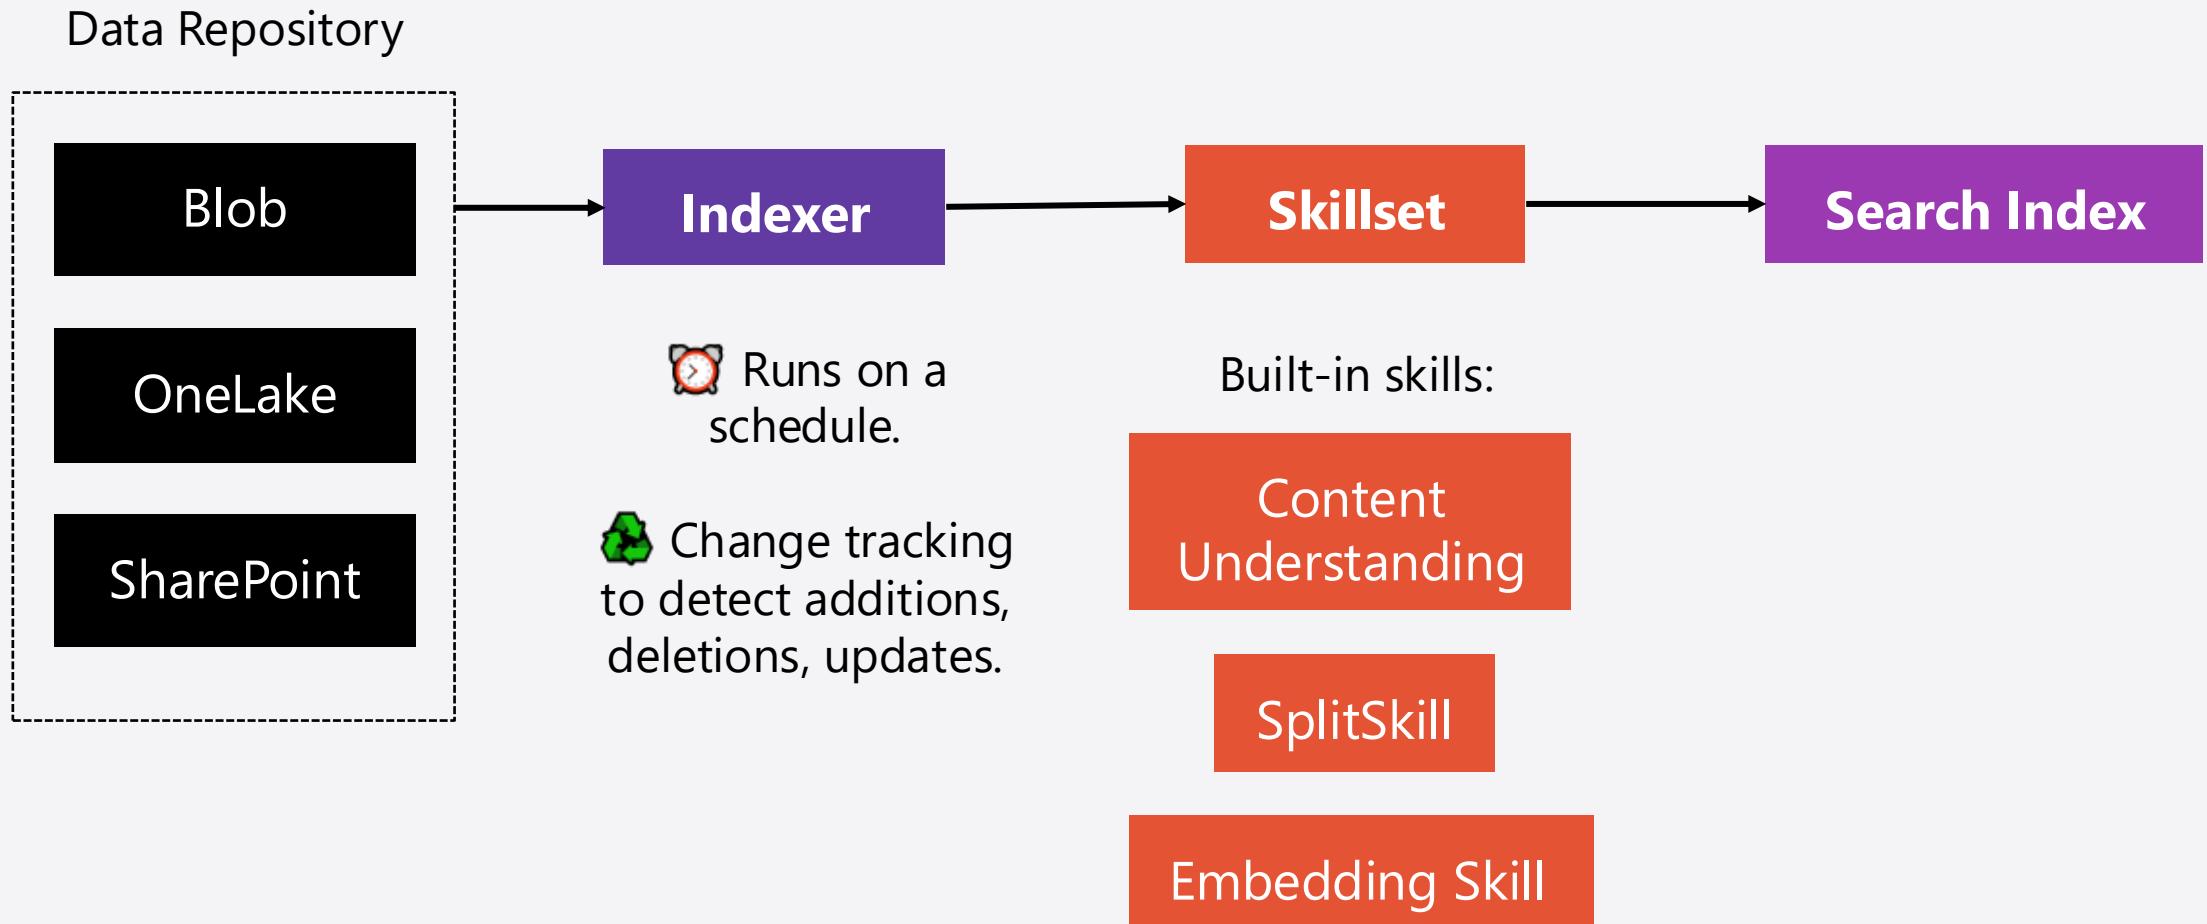

Remote SharePoint Knowledge

Indexed SharePoint Knowledge

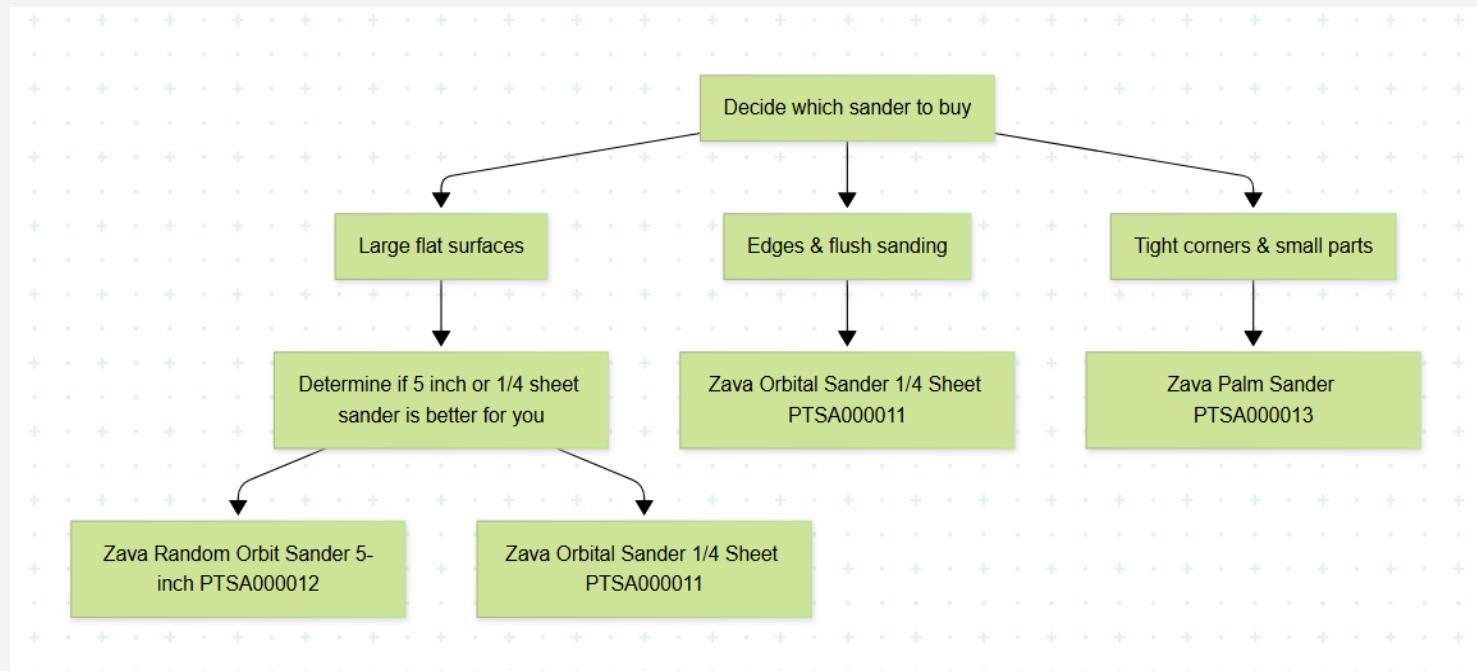

Indexed Knowledge Ingestion

Content Understanding

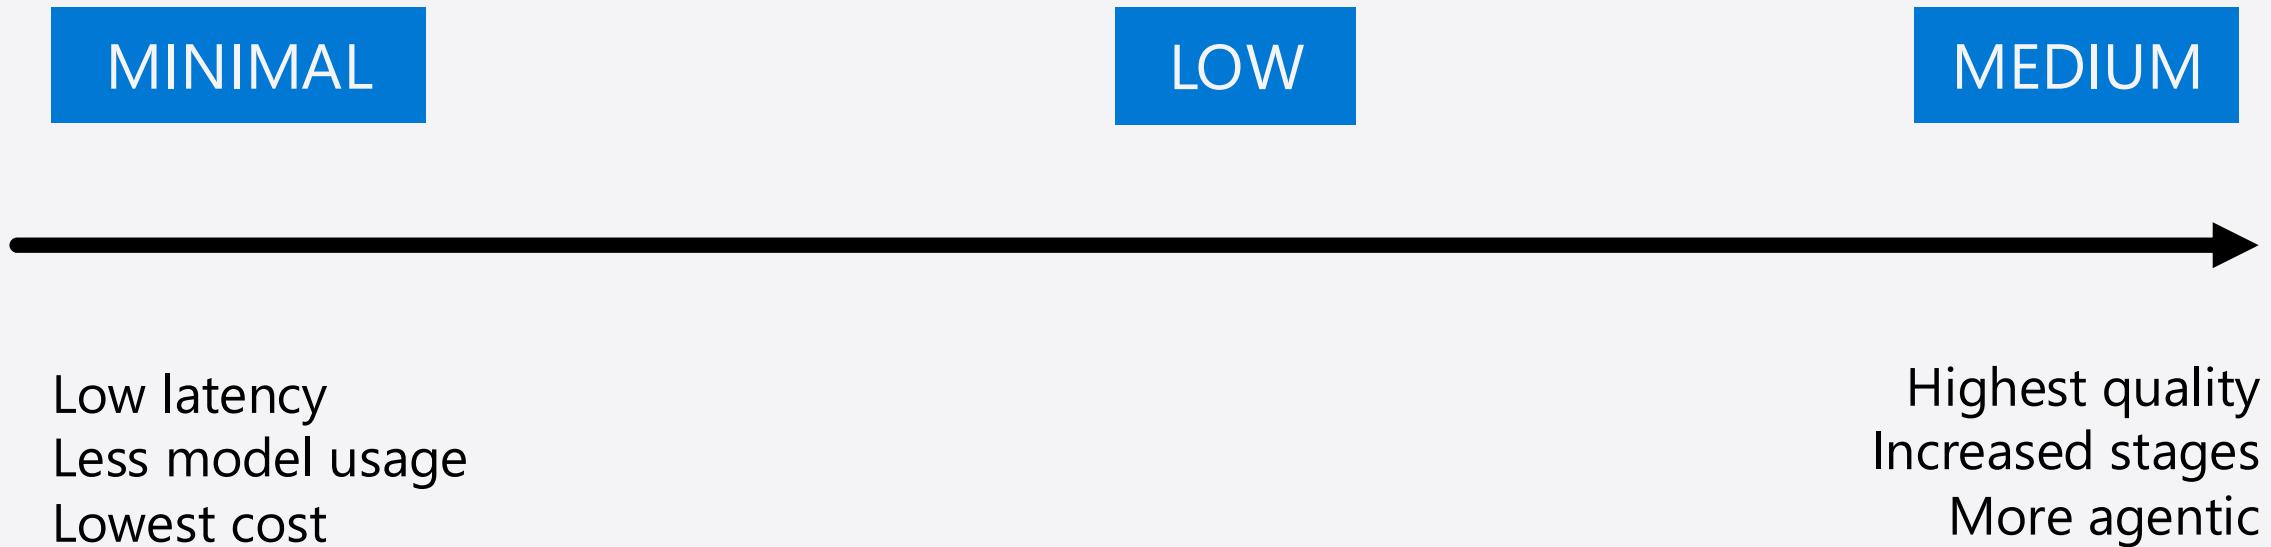

Indexed knowledge sources offers multiple parsing modes:

- **minimal**: Leverage free default parsing capability of indexers
- **standard**: Use Content Understanding to enrich extracted documents with media descriptions

<figure>
Decide which sander to buy
Large flat surfaces
Edges & flush sanding
Tight corners & small parts
Determine if 5 inch or 1/4 sheet
sander is better for you
Zava Orbital Sander 1/4 Sheet

Knowledge base retrieval reasoning effort

Knowledge base with minimal effort

Minimal does *not* include:

- Query planning
- Knowledge source selection
- Web source
- Answer synthesis
- Iterative retrieval

Search intents
represent queries.

All intents are sent
to *all* sources.

Example of minimal effort

Input

"what's best Zava paint for bathroom walls?"

* You may optionally pass in *multiple* intents.

Output

Activity log

Step	Details
Search ""what's best Zava paint for bathroom walls?""	Source: Search index Results: 8
Search ""what's best Zava paint for bathroom walls?""	Source: SharePoint Results: 2

Intent is sent to *all* sources.

One-Coat Interior Paint, price
\$50.00r\n#\r\nBrand\r\nZavaTech Hardware

🏆 Re-ranker score: 2.95

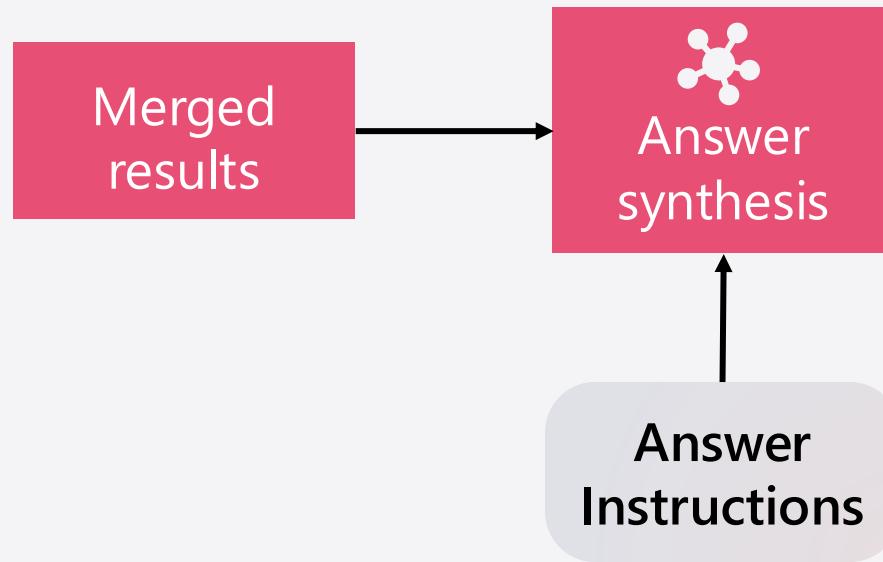

Answer synthesis

A semi-gloss interior paint is suitable for use in a bathroom because it offers moisture resistance, is washable, and stands up well to humidity and frequent cleaning. This type of paint is specifically recommended for bathrooms, kitchens, and trim work due to its durability and ease of maintenance [ref_id:1]. The typical cost for a can of Interior Semi-Gloss Paint from ZavaTech Hardware Solutions is \$47.00 [ref_id:2].

Answer synthesis is *optional*.

Answer synthesis with instructions

MINIMAL LOW MEDIUM

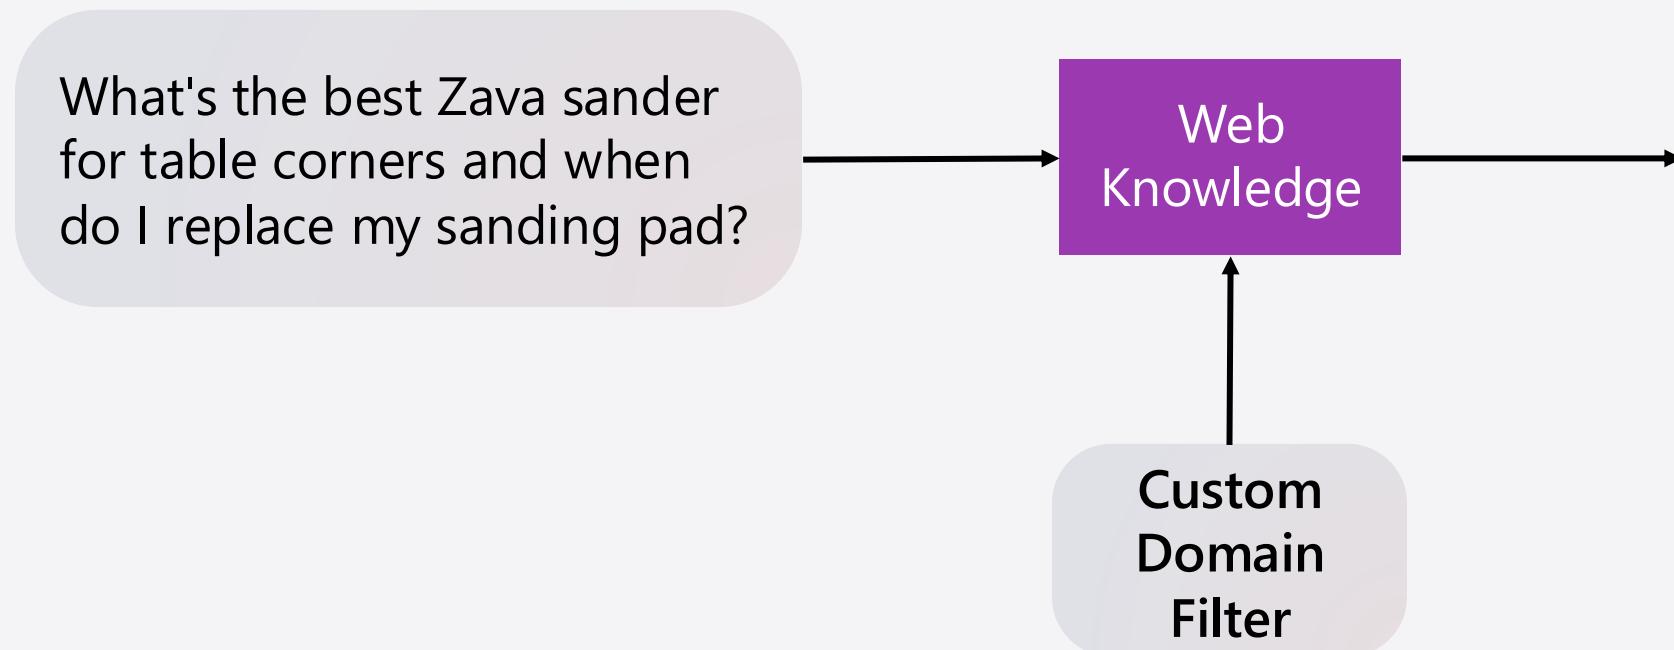

Instructions	Answer
Default (no instructions)	A semi-gloss paint is highly recommended for bathrooms due to its moisture resistance, washable surface, and ability to withstand humidity and frequent cleaning, making it ideal for bathroom walls and trim [ref_id:0][ref_id:1]. While specific price ranges are not provided, semi-gloss paints are typically available at hardware stores and online, with costs varying by brand and quality [ref_id:1]. For best results, ensure proper surface preparation and apply two thin coats for a durable, long-lasting finish [ref_id:0][ref_id:1]
"Answer with bullet points"	<ul style="list-style-type: none">- Semi-gloss interior paint is recommended for bathrooms due to its moisture resistance, washability, and durability against humidity and splashes [ref_id:0][ref_id:2][ref_id:4].- Flat or eggshell finishes are less suitable for bathrooms, as they do not handle constant humidity as well as semi-gloss [ref_id:4].- The typical cost for a can of interior semi-gloss paint is around \$47.00 [ref_id:2].
"Answer with a haiku"	Moisture in the air— Semi-gloss shines, stands strong here. Bathrooms: \$47 [ref_id:2].

Title: Why semi-gloss paint is the best for bathrooms

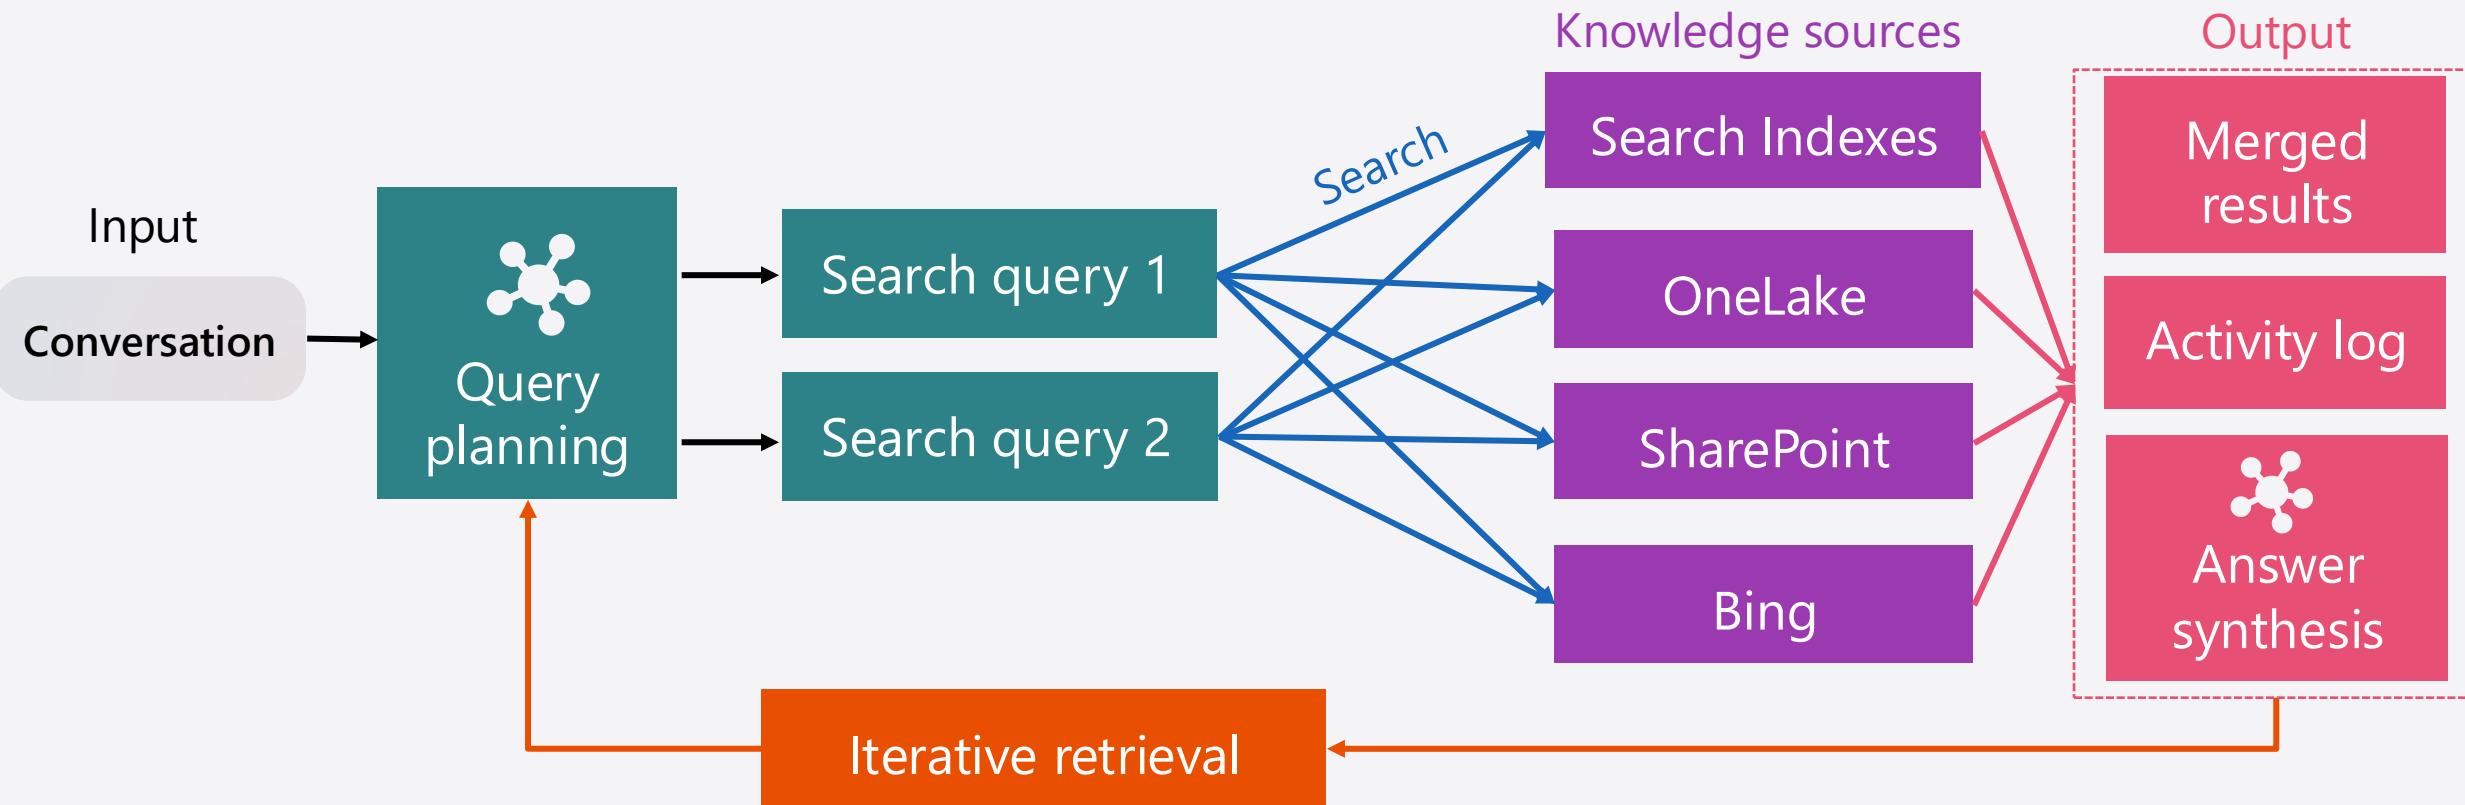

Answer synthesis

A semi-gloss interior paint is suitable for use in a bathroom because it offers moisture resistance, is washable, and stands up well to humidity and frequent cleaning. This type of paint is specifically recommended for bathrooms, kitchens, and trim work due to its durability and ease of maintenance [ref_id:1]. The typical cost for a can of Interior Semi-Gloss Paint from ZavaTech Hardware Solutions is \$47.00 [ref_id:2].

Answer synthesis is *required* for web knowledge.

Knowledge base with medium effort

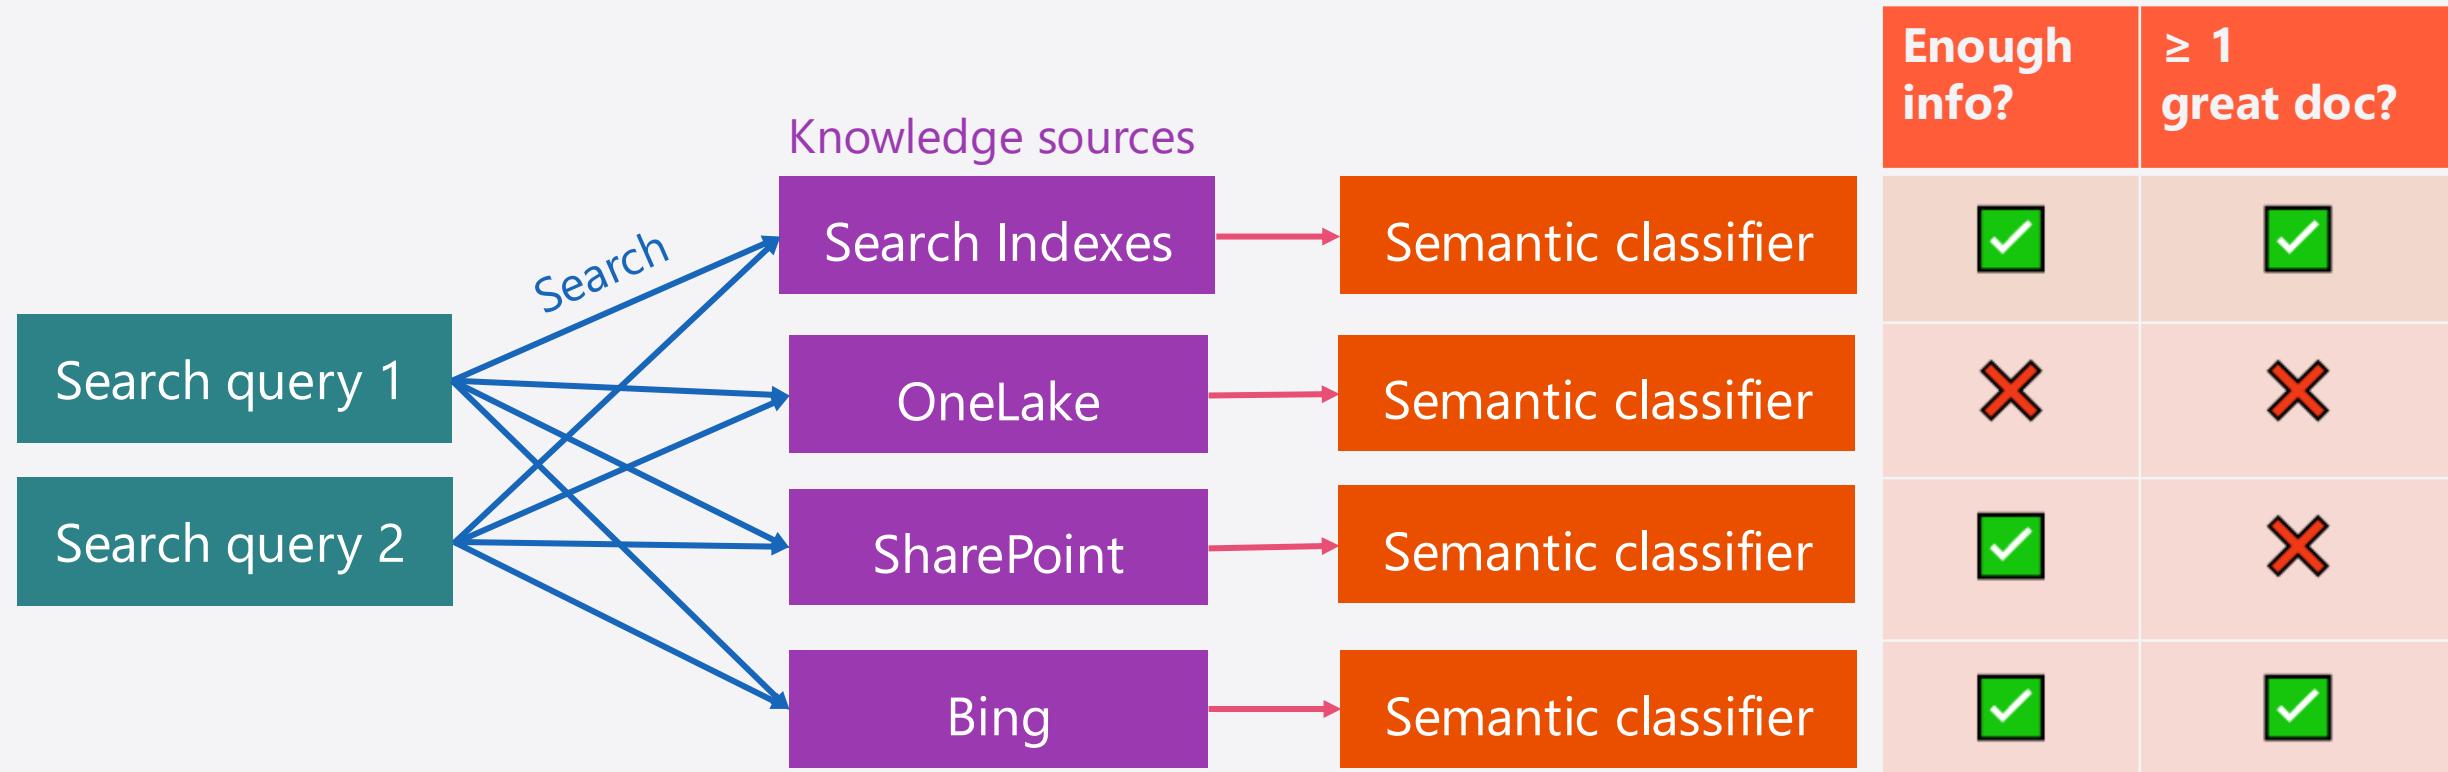

New model for results merging

MINIMAL LOW MEDIUM

Medium reasoning effort uses an additional model: **semantic classifier**

- Trained to recognize when there's enough context to answer the question
- Takes a 2nd pass at scoring documents

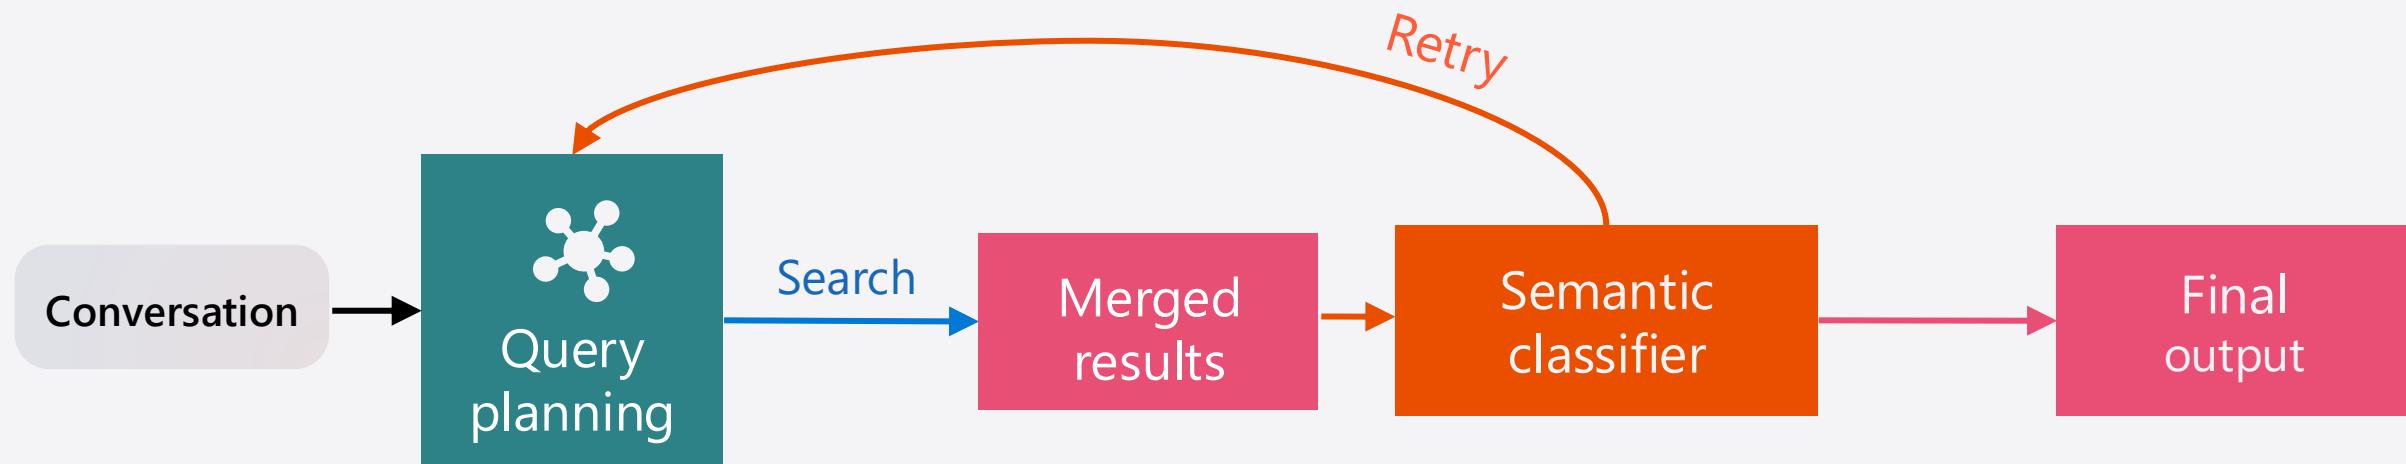

Iterative search

MINIMAL LOW MEDIUM

Retry on insufficient results

- The next try of query planning considers the previous results

Example of medium effort

Input

Explain how to paint my house most efficiently. Then give me a list of the Zava products and prices for each supply

Output

Activity log

Step	Details
Query planning	Input tokens: 1484 Output tokens: 115
Search "efficient house painting"	Source: manuals
Search "Zava paint supplies prices"	Source: manuals
Search "efficient house painting"	Source: web
Search "Zava paint prices"	Source: web
Query planning	Input tokens: 1169 Output tokens: 249
Search "paint brushes rollers trays"	Source: manuals
Search "paint brushes rollers trays"	Source: web

<https://www.qualitypreferred.com/choosing-the-right-method-the-best-way-to-paint-a-house>

Title: The Best Way to Paint a House

Answer synthesis

The most efficient way to paint a house is to work from the top down: start by prepping all surfaces, then paint ceilings first, followed by trim and baseboards, and finish with the walls, using rollers for large areas and brushes or pads for detail work to minimize drips and touch-ups [ref_id:5][ref_id:3][ref_id:4]. For exterior painting, clean and repair surfaces, prime exposed areas, and always paint from high to low, finishing with doors and trim [ref_id:5][ref_id:6].

Below is a list of Zava paint supplies:
* Exterior Acrylic Paint: \$57.0 [ref_id:1]
